# How to treat water using WaterGuard

1. **Filter the water using a clean cotton cloth.**

2. **Pour one capful of WaterGuard liquid into a 20-litre jerrican full of un-boiled water.**

3. **Cover the jerrican and shake thoroughly until WaterGuard is completely mixed with the water. Wait 30 minutes.**

4. **Your water is now safe to drink!**

**NOTE:**
- If using WaterGuard liquid, for very dirty water, filter, pour 2 capfuls into 20 litres of water, then follow steps 3 to 4.
- If using WaterGuard tab, for very dirty water, filter, add 2 tablets to 20 litres of water, then follow steps 3 to 4.
