HIV/AIDS Counseling and Testing Specialist

Why is it important to know your HIV Status
Q) Where should I go for HIV Testing?
Ans) You can go to any Voluntary Counseling and Testing Centre

Q) How will be my HIV Test done?
Ans) The HIV test will be done through blood test.

You will benefit by knowing your HIV status

If your medical test comes negative, then it means that you are not infected with HIV. The counselor will tell you how to stay HIV negative and lead a healthy life.

If your test result is positive then you are infected with HIV. Here the counselor will tell you, how you can keep your spouse and yourself safe.

You will get consistent medical tests, counseling and advice to lead a happy life.
